ECO ALERT ■ Alarm window handle with climate function

FO-310 AK

The innovative and high-quality FO-310 AK combines the standard turn / tilt function with an autonomous alarm and climate function. Simple usability with object-suitable 90° ball latch.

- Ideal for retrofitting windows and terrace doors
- No power supply
- Alarm function with 115 dB(A)
- VDS tested
- Inkl. fixation screws and battery
- Climate function 50, 55, and 60% relative air humidity

FO-310 AK ER	Stainless steel satin brushed	∅ 10 mm / 12 mm	35 - 40 mm	37 mm	102730014600037
FO-310 AK ER	Stainless steel satin brushed	∅ 10 mm / 12 mm	41 - 45 mm	43 mm	102730024600043

Product information

■ Your home safer

Glass breakage and levering of the window – these are the most common burglary attempts at windows. This is where the alarm window handle shows its full strength. It detects every movement of the window with the integrated 3D-sensor. Feel safe!

■ Alarm function

The window handle detects burglary-typical movement and vibration patterns through the 3D-sensors built into the handle and reacts with a 115 dB (A) alarm tone for the duration of three minutes (comparable to a smoke detector).

■ Prevent mould

Mold is the nightmare in every flat. So that it does not arise in the first place, the alarm handle shows if the room climate is in a critical range - even before it is perceptible for the human. Ventilate properly!

■ No electrical connection necessary

The alarm handle is easy to mount, easy to adjust and can be operated with a standard battery (1/2AA 3,6V) independently from the power grid. Up to two years with a single battery. Low power warning through an acoustic signal.

■ Easy retrofitting for old- and new buildings

The alarm handle is available with three pin lengths. Thus it is ideally suitable for old or new buildings and as a retrofit for your existing window handles. All you need is a screwdriver.

■ Elegant design

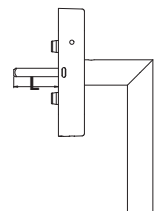

Timeless and precious meets innovative technology. The stainless steel window handle is completely independent from the power grid. Every window handle is an autonomous system without a complex control unit.

Due to its VdS-certified sensitivity, an ECO ALERT alarm window handle also takes care of the monitoring of multi-leaf windows. Furthermore we offer window handles in the same high-class design but without alarm and climate function to ensure optical unity.

Which pin length is needed?
You unscrew your old window handle and measure the protruding pin length (L)* in mm (see table above).
