

RANDI-LINE® L-BOW

Our newest product: Randi-Line® L-Bow.

Mads Miltersen Design MDD (member of Design Denmark) works with product design, furniture design and architecture.

The concept

The importance of good hand hygiene has become increasingly evident. Things touched by many people's hands are a potential source of the spread of virus and bacteria. One such thing is a door handle. This inspired Mads Miltersen Architect and Designer MDD to design an aesthetic and simple handle that makes it possible to open and close a door using your elbow instead of your hand. The handle can be mounted on most existing door handles without the use of tools, nuts or bolts.

Randi-Line L-Bow

The L-bow handle is made of just one plastic part and simply clicks onto an existing door handle. Mounting can be accomplished in a very short time by most people. No need for skilled workers or tools. Likewise L-bow handles can be removed just as easily for cleaning and leave no marks on the original grip.

The handle is available for door handle diameters of 16 mm, 19 mm or 21 mm.

Available from 3rd Quarter 2020
